It's easy to customize a network design and configuration service

Low-cost
High-performance
networks

For details, contact
us at 508.244.2445
or by email at
information@retrofit.com

Need a Network Design? It's as simple as:

- 1 Contact RetroFit for your design needs at 508.244.2445 or email us at information@retrofit.com.
- 2 RetroFit will send you a Job Submittal Form for you to complete. Once it is completed, you can fax the form back to us at 508.478.2040.
- 3 RetroFit will send you a job ID number for your records. Please keep this number for further correspondence with our Design Center. Your network design will be delivered within a week (additional time may be required for complex designs).

Let RetroFit be your network design partner. Our Design Center services allow RetroFit and HP ProCurve Networking to be your network design partner – freeing you from the time-consuming task of developing the best network infrastructure to meet your current and future needs.

RetroFit and ProCurve's Configuration Service enables you to see what your investment requirements may be based upon your site(s) structure, topology, wiring, and building(s) location(s). Our technical resources will provide you with a Bill of Materials (BOM) highlighting an itemized list of product requirements.

Our comprehensive Network Design services will generate drawings, including detailed explanations and recommendations based upon your business or project requirements. These designs can address the following:

- ✓ Current and future traffic levels
- ✓ Wired
- ✓ Convergence
- ✓ Wireless or security needs
- ✓ Budget constraints
- ✓ Ability to interface with legacy equipment

These services are at no cost to you!
