Stop Spam Today

Billions of spam messages are being sent every year...the number keeps rising! Plus, there's viruses, malware and other malicious content being sent every day to your users. Is your email network ready to handle the deluge?

What's your plan to battle spam?

retroSpamGuard

Email Security Hosted Software (SAAS)

Powered by  RedCondor
secure

Key Benefits:

- **Fully Managed Service** – RetroFit does all the work for you – there's nothing to install or maintain! Simply redirect your email to our servers and we filter it before sending it on to you. We'll ensure that legitimate emails don't get accidentally marked as spam, so you won't lose important email.
- **Perimeter Defense** – Our technology provides perimeter layer protection from denial of service and other email service attacks. We'll stop the most abusive email attacks and block spam campaigns before they enter your network.
- **Advanced Spam & Virus Protection** – Our multi-layer spam filter technology eliminates fraudulent and predatory email based on absolute criteria that results in decisive action. Our target filter rules eliminate spam and viruses while keeping end user email private and secure.
- **End User Spam Management** – A Personal Dashboard allows each mailbox owner to refine policies and review quarantined spam. Each user can receive a Spam Digest report which provides visibility to the effectiveness of their filter profile.
- **Administrator Management Tools** – Domain administrators can easily set email filter policy and monitor filter performance from a powerful, graphical interface.

- **Multi-Layer Protection from One Service**
This solution also filters viruses, spyware, phishing schemes, and Trojans.
- **Next Generation Filtering Algorithms**
There's no filter tuning required with RetroSPAMGuard. We don't rely on Bayesian, Hueristics, or Blacklists to determine if you've received legitimate email or spam.
- **Zero Tolerance for False Positives**
Less than 0.01% false positives with spam block rates greater than 98%. You can your mail – and nothing else!
- **Perimeter Defense System** – RetroFit acts as a perimeter defense in front of your email server. When aggressive or malicious spammers attack your email server, we take the brunt of the attack.

ABOUT RETROFIT TECHNOLOGIES
